

since when does the nab dictate policy to the fcc? i subscribe to satellite radio and it is a choice. do not take away my personal choice to use satellite radio. it does no harm to offer traffic and weather on xm or sirius to local broadcasters. people are not going to choose xm because they offer weather and traffic. they choose because of the choice that satellite radio offers. And by the way they pay for it so give them the choice they desire and say no to petition 04-160
